

**ADHD Resource List**  
Revised October 29, 2009

The following medical professionals in the south central Pennsylvania region have been identified as having expertise in treating patients with ADHD. As of late 2008/early 2009, they were all taking new patients, although most have a lead time of several months.

Please note that this list includes only those practices that were contacted by phone or have discussed their qualifications with the Harrisburg Area ADHD Support Group ([www.chadd.net/119](http://www.chadd.net/119)). It is NOT all inclusive. There are undoubtedly many more specialists in our area.

If you are an ADHD specialist, and you would like to be included on this list, please contact Beth Prosser at (717)441-4354 or [beth@adhd-solutions.net](mailto:beth@adhd-solutions.net).

Specialty	Practice	Name	Adults, children, or both?	Comments
